PLANT HATCH - UNIT 2
NRC DOCKET 50-366
OPERATING LICENSE NPF-5
GENERIC LETTER 89-16
COMPLETION OF HARDENED VENT INSTALLATION
NRC TAC NO. M74870

Gentlemen:

On October 24, 1989, Georgia Power Company (GPC) responded to Generic Letter 89-16, "Installation of a Hardened Wetwell Vent." The generic letter informed owners of BWR plants with Mark I containments of the NRC program for disposition of issues related to the Mark I Containment Performance Improvement Program and encouraged licensees to voluntarily install a hardened vent under 10 CFR 50.59. In our response, GPC committed to install a hardened vent on Unit 2 before startup from the end of cycle 10 refueling outage.

This letter provides notification of completion of the hardened vent installation on Plant Hatch Unit 2. As specified in our response letter, this installation was completed during the Fall refueling outage which recently ended. This completes all action in response to Generic Letter 89-16 for Plant Hatch Unit 2.

If you have any questions in this regard, please contact this office.

Sincerely,

J. T. Beckham, Jr.
