Docket No.: 50-271

Mr. Warren P. Murphy
Senior Vice President, Operations
Vermont Yankee Nuclear Power Corporation
RD 5, Box 169
Ferry Road
Brattleboro, Vermont 05301

Dear Mr. Murphy:

SUBJECT: 1993 NRC EROSION/CORROSION WORKSHOP

We would like to invite you and members of your staff to participate in the 1993 NRC Erosion/Corrosion Workshop. The workshop is scheduled to be held in Region I on February 9, 1993. The objective of the workshop is to address current erosion/corrosion (EC) issues by promoting industry, NRC, and research organization discussions in regard to EC in high energy, carbon steel piping systems. The morning of the workshop is divided into a number of talks by industry, NRC and EPRI members relative to the implementation of EC programs by industry licensees.

The afternoon of the workshop will allow participants to attend one of three discussion groups (breakout sessions). The breakout sessions cover the following areas relative to implementation of EC monitoring programs: A) EC monitoring program scopes, including methods for selecting systems and components for inspection, B) practices for inspecting carbon steel components, and C) methods of evaluating inspection data and dispositioning results. The discussion groups will present their findings to the collective workshop audience at the end of the breakout sessions. Final concluding remarks will be made by industry and NRC members at the end of the workshop program.

We request that you inform us of the estimated number of your staff who wish to attend the workshop by January 6, 1993, and update the number of participants by January 20, 1993. Also, please indicate the names of those attending the workshop and their personal preference for the afternoon discussion groups. A form is enclosed which may be used to ease your efforts. Please fax this form to Mr. Al Lohmeier at (215) 337-5320 or mail the form in to Mr. Al Lohmeier at the address listed on the form.
