PRELIMINARY NOTIFICATION

Date: February 8, 1980

PRELIMINARY NOTIFICATION OF EVENT OR UNUSUAL OCCURRENCE--PNO-III-80-29

This preliminary notification constitutes EARLY notice of events of POSSIBLE safety or public interest significance. The information presented is as initially received without verification or evaluation and is basically all that is known by IE staff as of this date.

Facility: Commonwealth Edison Company
Quad Cities Nuclear Power Station, Unit 2
Docket Number: 50-265
Cordova, IL

Subject: INDUSTRIAL ACCIDENT

At 9:00a.m. on February 8, 1980, the licensee informed the Resident Inspector of an industrial accident which occurred in the Unit 2 Torus and involved a contractor who severed two of his fingers. The contractor was immediately rushed to the hospital. An initial survey for contamination was accomplished and no gross contamination was detected, however, licensee radiation protection personnel accompanied the contractor to the hospital to further determine if any contamination is present. Contamination is not expected to be significant because of the relatively low levels of contamination in the area of the Torus.

Neither the licensee nor RIII plan to make a press release.

The State of Illinois is being notified.

This PN is issued for information only and is current as of 10:30a.m. on February 8, 1980.

Contact: N. J. Christosimos, Resident Inspector, 309/654-2227; R. L. Spessard, RIII, 334-2547.
