

Valentine's Day  
1980

Sheldon J. Wolfe, Esq.  
Atomic Safety and Licensing Board  
Washington, D.C. 20555

Dear Sir:

We feel that the issue of a meltdown (a Class 9 Accident) should be explored fully in the hearings on Black Fox Nuclear Power Plants near Inola, Oklahoma. We request that the Environmental and Site Suitability Hearings be reopened to address this important issue.

Black Fox is very close to Tulsa and if a meltdown did occur it would definitely destroy Tulsa and much or all of the state. This is too important to be dismissed.

Thank you.

Sincerely,

Don and Donna Plant
