Gentlemen:

Reference 1 submitted Supplement 5 to the CPSES Human Factors Control Room Design Review Final Report. It reported the status of the final activities of the CPSES Detailed Control Room Design Review (DCRDR) with regard to differences in design between Unit 1 and Unit 2 for the licensing of Unit 2. Additional requirements of Reference 2 require TU Electric to perform environmental surveys to satisfy the guidelines for the DCRDR Program. The attached report contains the results of these surveys.

If you have any questions concerning the CPSES DCRDR, please contact either Wendell Knight at (817) 897-8512 or Richard S. Berk at (214) 812-8952.

Sincerely,
