

DOCKET N° 50-556,557
PROD. & UTIL. FAC.

I am opposed to nuclear power plants, nuclear energy in general, the whole nuclear processing cycle.

I am opposed to the exploitation & poisoning of all living beings & even the earth itself.

I am angered & despairing at the society morals & economic factors that allow the proliferation of nuclear energy / forces. The brutality of man against his brothers & sisters & even the earth itself, astounds & horrifies me.

I believe local self reliant / self sufficient communities are a large part of the solution of the overwhelming questions of this time in history. I believe after we learn to satisfy our demands & desires with simpler tastes, after we trim the extravagance from our lifestyles most home energy needs can be met by on site generation or small clumps of independent units.

around small independant generators.
Then a minimum amount of hard
energy in the form of gas, coal would
be necessary in the manufacture of
chainsaws, steel tools, chains, small
efficient tractors, bicycles, useful tools
contributing to a self reliant, independent
society. Of course hard energy would
be used to manufacture armaments
& such unfortunately necessary
stuff.

I support self reliant, self suf-
ficient, independant communities.

NO to Nuclear Power

No to the Rape of Northern
Great Plains

No to the Rape of the South
West Desert

No to the Consumer Mentality

Grow yer own, make yer own,
do it with friends, together!
Peace on Earth & Goodwill to
all Men!

Matt Meeks
