

DOCKET NUMBER
PROD. & UTIL. FAC. 50-367

Feb. 22, 1980

Secretary of the Commission
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Sir:

The permit to construct the
Bailly Nuclear Plant on the
southern shore of Lake Michigan
should not be ~~extended~~. A
nuclear plant, so close to the
homes of millions of people, is
altogether too dangerous. We
already have a nuclear plant
in Zion - too close to millions.
To have one equally close on
the other side would double
the danger.

Sincerely,

Alice E. Heck

Mrs Alice E. Heck
