

400 Chestnut Street Tower II

April 15, 1980

Director of Nuclear Reactor Regulation
Attention: Mr. L. S. Rubenstein, Acting Chief
Light Water Reactors Branch No. 4
Division of Project Management
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Rubenstein:

In the Matter of the Application of) Docket Nos. 50-327
Tennessee Valley Authority) 50-328

Enclosed is a copy of the revised Emergency Operating Instructions (EOI) requested by your letter to H. G. Parris dated March 7, 1980. The enclosures, EOI-0, EOI-1, EOI-2, and EOI-3 are draft plant procedures which have been reviewed by other TVA organizations and by Westinghouse. Although TVA and Westinghouse comments have been incorporated, plant operator training on the procedures has not been completed, and the Plant Operations Review Committee (PORC) approval has not been obtained. Consequently, the approved EOI's will not be transmitted to you until the approval process is complete, which should be before April 28, 1980.

As requested in your letter, an EOI-0 procedure has been established. The enclosed EOI-0 procedure was written to the NRC's approved Westinghouse Owners' Guidelines (WOG) for the EOI-0. The revised EOI-2, Revision 10 was also written to the NRC's approved WOG guidelines, and it is responsive to your comments on format and organization concerning your staff review of the previous version of that procedure, Revision 8. In general, the revised EOI's reflect the comments and questions of the enclosure to your March 7, 1980, letter. Each of the specific comments and questions of your enclosure will be addressed by TVA in a separate response on or before April 21, 1980.

If you have any questions, please get in touch with M. J. Burzynski at FTS 854-2581.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
