

Pursuant to 10 CFR §50.91 of the Commission's regulations, the Commission has found that the amendment does not involve a significant hazards consideration. Pursuant to 10 CFR §2.105(a)(4) of the Commission's regulations, the Director of Nuclear Reactor Regulation has, in the exercise of his discretion, determined, in the circumstances obtaining here, that an opportunity for a public hearing should be afforded, particularly in light of recent expressions of citizen interest in this matter.

Accordingly, notice is hereby given that, by December 31, 1979, the Permittee may file a request for a hearing and any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to whether, pursuant to 10 CFR §50.55(b), good cause has been shown for extension of the completion date for Construction Permit No. CPPR-104 for a reasonable period of time; i.e., with respect to whether, pursuant to 10 CFR §50.55(b), the causes put forward by the Permittee are among those which the Commission will recognize as bases for extending the completion date. Petitions for leave to intervene must be filed in accordance with the provisions of this FEDERAL REGISTER Notice and 10 CFR §2.714 of the Commission's regulations. A petition for leave to intervene must set forth with particularity the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding, including the reasons why petitioner should be permitted to intervene with particular reference to the factors in paragraph (d) of 10 CFR §2.714. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which the petitioner wishes to

intervene. Such petition must be filed with the Secretary of the Commission, U. S. Nuclear Regulatory Commission, Washington, D. C. 20555, Attention: Docketing and Service Section, by the above date. A copy of the petition and/or request for hearing should be sent to the Executive Legal Director, U. S. Nuclear Regulatory Commission, Washington, D. C. 20555 and to William H. Eichhorn, Esq., 5243 Hohman Avenue, Hammond, Indiana 46362, the attorney for the Permittee.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, the petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

All petitions will be acted upon by the Commission, or licensing board designated by the Commission, or by the Chairman of the Atomic Safety and Licensing Board Panel. Timely petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the petitions.

In the event that a hearing is held and a person is permitted to intervene, that person becomes a party to the proceeding and has a right to participate fully in the conduct of the hearing. For example, a party may present evidence and examine and cross-examine witnesses.

For further details with respect to this matter, see the application for amendment dated February 9, 1979, and amendment thereto dated August 31, 1979, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, N. W., Washington, D. C., and at the Westchester Township Public Library, 125 South Second Street, Chesterton, Indiana.
