

DOCKET NUMBER
PROD. & UTIL. FAC. 50-289
(Restart)

Feb. 10, 1981
820 Chaucer Drive
Harrisburg, PA 17111

Mr. Ivan Smith
Chairman
Atomic Safety Board
NRC
Washington, D. C. 20555

Dear Mr. Smith:

I believe that one person can
light a candle in the darkness &
do more good than cursing. I am
writing to tell you I am against
restarting MI - Unit 1. That
this can even be considered is
revolting and repulsive to me.
yes, it makes me want to curse
big business and big government.
As chairman of the "Atomic
Safety Board," you must realize

Rec'd - 2/17/81

DS03

That the name itself is
contradictory. The events at
Unit 2 TMI will speak for
themselves. Met-Ed & G.P.U.
were not worried about our
safety - but only their profits,
dividends, and stocks, etc.

I think I have made myself
clear - I am not in favor of
restarting TMI, Unit One. As a
member of a local organization,
I also had a hand in my
township (Svatawa Township) polling
its citizens in order to be able
to make a resolution against
the restart of Unit 2 and for
the closing of TMI as a nuclear
generating facility forever.

Sincerely, (ms.) Catherine B. Zales
