Docket 50-293

Proposed NRC Generic Communication,
Augmented Inservice Inspection Requirements for
Mark I and Mark II Steel Containments, Refueling Cavities and
Associated Drainage Systems, 57 FR 54860, dated November 20, 1992

Reference: NUMARC Letter to Mr. S. J. Chilk, Secretary, USNRC,
dated December 17, 1992

Dear Sir:

Boston Edison Company has reviewed the NRC proposed Generic Communication on Augmented Inservice Inspection Requirements for Mark I and Mark II Containments, Refueling Cavities and Associated Drainage Systems.

The Federal Register Notice provides a thirty day comment period for the NRC proposed requirements. The 30 day period is insufficient for a thorough evaluation and formulation of technical comments. We recommend an additional 60 days be provided to facilitate a more thorough evaluation of the proposed requirements.

We endorse the referenced NUMARC comments and positions offered to the NRC on behalf of the nuclear industry.

Sincerely,

ET Boulette

E. T. Boulette
Acting Senior Vice President
