Mr. John A. Ashmore, Chairman
 U. S. Nuclear Regulatory Commission
 Washington DC 20555

Dear Mr. Ashmore:

I don't know what the
 right thing to start this letter
 with is. Putting it at the
 & length of the communi-
 cation, already shocked &
 previous accident, as in

we know that the
 radio station involved in the
 accident would kill thousands. no
 matter what circumstances were in-
 volved. I think the damage to
 people must be the first consideration
 & that the unit should not be started.
