

March 2, 1981

Mr. Ivan H. Smith, Chairman  
Atomic Safety & Licensing Board  
25 N. Court St.  
Harrisburg, Pa. 17101

Dear Mr. Smith,

It is my understanding that a meeting of the above Board is to be held in Harrisburg regarding the TMI Unit 1 restart.

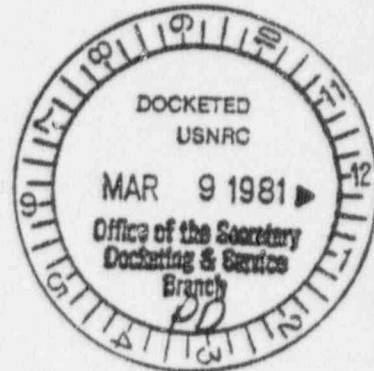

There has been nothing wrong with TMI-1 and I am greatly concerned with the long idleness of such a plant and the higher cost of our electricity due to its shutdown.

Therefore, I strongly recommend that TMI-1 should be activated just as soon as possible.

Very truly yours,

(Ms) Dollis M. Dickson
