Subject: McGuire Nuclear Station, Unit 1 Docket No. 50-369

Gentlemen:

On May 8, 198°, it was discovered that an operations group procedure did not specify to compensate hydrogen concentration in containment as given by the hydrogen analyzer due to temperature since the sample lines were not heat traced. This has been determined to be reportable with a report due June 7, 1985. Due to the extensive investigation, this date was not met. The investigation is continuing, and the report will be submitted by June 21, 1985. If you have questions, please contact Jerry Day at (704) 373-7033.

Very truly yours,

HB. Tuch / 1/68

Hal B. Tucker
