Gentlemen:

SUBJECT: NRC INSPECTION REPORT 50-285/92-30

This refers to the inspection conducted by Mr. P. Wagner, other inspectors from this office, and a consulting engineer December 7-11, 1992. The inspection included a review of activities authorized for your Fort Calhoun Station facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection included the followup of issues identified during the electrical distribution system functional inspection and other previously identified issues. The inspection consisted of selective examination of procedures and representative records, interviews with personnel, and some independent calculations.

No violations or deviations were identified during the inspection.

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Samuel J. Collins, Director
Division of Reactor Safety
