Docket No. 50-266
Docket No. 50-301

Wisconsin Electric Power Company
ATTN: Robert E. Link
Vice President
Nuclear Power
231 West Michigan Street - P379
Milwaukee, WI 53201

Dear Mr. Link:

SUBJECT: PHYSICAL SECURITY AND MATERIAL CONTROL AND ACCOUNTABILITY INSPECTION
AT POINT BEACH

This refers to the inspection conducted by Mr. T. J. Madada of this office on November 30 - December 4, 1992. The inspection included a review of authorized activities for your Point Beach Nuclear facility. At the conclusion of this inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, and interviews with personnel.

Based on the results of this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation (Notice). The violations are of concern because weaknesses in your management oversight of the material control and accounting program resulted in the loss of a small amount of special nuclear material which was not identified in a timely manner.

Although 10 CFR 2.201 requires you to submit to this office, within 20 days of your receipt of this Notice, a written statement of explanation, we note that the violations have been corrected and the corrective actions were reviewed during this inspection. Therefore, no response with respect to this matter is required. However, we do request that you provide a written description of your analysis of completed corrective actions for a previous escorting violation to determine if any additional or different actions are required to prevent additional recurrence. You are requested to provide your response within 30 days of receipt of this report (see Section 2.a of Report Details). Your initial corrective actions for the violation identified in inspection reports 50-266/92017 and 50-301/92017 did not appear to have been completely effective.

In addition, during this inspection, certain other of your activities appeared to be in violation of NRC requirements. However, as described in the enclosed inspection report (Section 6.a), you identified this violation. Therefore, the violation will not be subject to enforcement action because your efforts in identifying and correcting the violation meet the criteria specified in Section VII.B of the "General Statement of Policy and Procedures for NRC Enforcement Actions," (Enforcement Policy, 10 CFR Part 2, Appendix C).

Areas examined during this inspection concern a subject matter which is exempt from disclosure according to Part 73, Title 10, code of Federal Regulations, Section 73.21(c)(2). This information must be handled and protected in accordance with the provisions of 10 CFR 73.21. Consequently, our report of this inspection will not be placed in the NRC Public Document Room. In addition, areas examined during this inspection also concerns a subject matter which is exempt from disclosure according to Section 2.790 of the NRC's "Rules of Practice," Part 2, title 10, code of Federal Regulations. Consequently, the enclosure (Notice of Violation) to this letter and our report of this inspection will not be placed in the NRC Public Document Room.

The response requested by this letter is not subject to the clearance procedure of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

Original signed by Cynthia D. Pederson
