Dear Sir:

Subject: Oyster Creek Nuclear Generating Station
Docket No. 50-219
I. E. Bulletin 80-11

Our letters of July 7, 1980, September 19, 1980 and November 14, 1980 supplied the majority of our response to the subject bulletin.

The attached represents our final reevaluation of the design adequacy of all identified walls to perform their intended function under all postulated loads and load combinations. The modifications resulting from this reevaluation will be completed prior to the restart from our 1981/1982 Refueling Outage. If additional information or further clarification is needed, please contact Mr. M. Laggart of my staff at 609-693-6932.
