

FEDERAL EMERGENCY MANAGEMENT AGENCY

Washington D.C. 20472

April 23, 1981

MEMORANDUM FOR: Brian Grimes  
US Nuclear Regulatory Commission

FROM: Jonn E. Dickey   
Director, Radiological Emergency Preparedness  
Division

SUBJECT: Federal Emergency Management Agency (FEMA) Support for  
Indian Point Nuclear Power Station

Reference is made to my memorandum of April 2, 1981, subject as above.

In accordance with your discussion with my staff on April 22, 1981, and your request, attached is a copy of the Regional Assistance Committee (RAC) from FEMA Region II review of the draft New York State Radiological Emergency Preparedness (REP) Plan including the Westchester County plan. In summary, the deficiencies in the Plan fall into three broad categories as listed in the RAC review memorandum of April 6, 1981. Our conclusions stated in my April 2, 1981 memorandum still stand.

Unless there is some unforeseen development, I do not expect to provide you any further information on May 15.
