Gentlemen:

Attached is a copy of an addendum to the Federal Emergency Management Agency interim findings on the Waterford-3 Steam Electric Station (SES) Offsite Radiological Emergency Response Plans.

This addendum now resolves all NUREG-0654/REP-1, Rev. 1 planning elements regarding offsite radiological emergency planning around the Waterford-3 SES. If you have any questions, please contact Mr. Charles Hackney (817-860-8188) of this office.

Sincerely,

Original Signed By  
E. H. Johnson

E. H. Johnson, Chief

Responses by State of Louisiana to November 27, 1984 letter from FEMA Region VI concerning remaining NUREG-0654 Elements not Resolved

C.I.c. LINED agreed to address in the State Plan that LINED would support the site specific plan by FEMA Region VI.

Louisiana Response

Section VII Support and Resources, A. Federal, is revised as follows:

4. The provision of federal support to State and local response efforts will be accomplished according to the Federal Radiological Monitoring and Assessment Plan and the Federal Radiological Emergency Response Plan. It is expected that the response, to any support requested, would be as soon as practical realizing the extent of the request and availability.

A new paragraph #5 will also be added to read as follows:

5. Federal emergency response agencies dispatched will be located in close proximity to the State EOC. State and local emergency personnel will assist the federal response agencies in establishing nearsite operations.

Present Status - Resolved

I.10 LINED agreed to provide FEMA Region VI a copy of the hand method for estimating doses that would be included in the next revision of the State Implementing Procedures.

Louisiana's Response

Present Status - Resolved - A copy of the LINED manual dose assessment method has been received by FEMA Region VI.

J.9. LINED agreed to correct this element by putting the same wording in Waterford III Plans as now written in River Bend Plans.

Louisiana Response

Chapter 8, IV.E.2. Note: p.8-5:  
"standard man" will be replaced with "critical receptor."

Present Status - Resolved

J.10.E. LINED agreed to include a statement for the next plan revision concerning quantities of KI.

Louisiana Response

No plan revision is envisioned, since the state does not anticipate storage of KI. If the use of KI is indicated, it can be procured

in a short time from numerous pharmacists. However, we are aware that St. Charles and St. John the Baptist Parishes have received from LP&L three hundred 14-day supplies of KI each.

Present Status - Resolved

L.I.

(Issue #3) Yet to be resolved is the issue surrounding training and who is responsible for specific training. FEMA Region VI was told that Ron Perry with LP&L would send a signed EMS Council Agreement regarding training responsibility.

FEMA Region VI has now received a signed EMS Council Agreement regarding training responsibility. Date of agreement is March 5, 1985.

Present Status - Resolved
