Attention: Document Control Desk

Subject: Grand Gulf Nuclear Station
Unit 1
Docket No. 50-416
License No. NPF-29
Notification of Completion of the Commitment to Implement an
Emergency Diesel Generator Reliability Program that Complies
with Regulatory Guide 1.155, Section 1.2

GNRO-93/00005

Gentlemen:

By letter dated February 6, 1992 (GNR1-92/00024), the NRC provided the Safety Evaluation on Grand Gulf's compliance with the Station Blackout Rule (10CFR50.63). This Safety Evaluation identified additional information that would be required to complete the NRC's assessment of Grand Gulf's compliance with the Station Blackout Rule.

In a letter dated March 19, 1992 (GNRO-92/00032), Entergy Operations addressed the request for additional information specified in GNR1-92/00024. While most of the concerns were addressed, commitments were made to complete certain actions by specified dates. Notification of closure of two of the three commitments was provided in a letter dated October 29, 1992 (GNRO-92/00134). This letter provides notification of completion of the final commitment to implement an Emergency Diesel Generator Reliability Program that meets the requirements of Regulatory Guide 1.155, Section 1.2 by December 31, 1992.

If you have any questions concerning this commitment, please contact James Owens at (601) 437-6483.

Yours truly,

120060
