Docket No. 50-346

Toledo Edison Company
ATTN: Mr. Richard P. Crouse
Vice President
Nuclear
Edison Plaza
300 Madison Avenue
Toledo, OH 43652

Gentlemen:

This refers to the routine safeguards inspection conducted by Messrs. T. J. Madeda, G. L. Pirtle and B. Drouin of this office on April 29 to May 2, 1985, of activities at the Davis-Besse Nuclear Power Station authorized by NRC Operating License No. NPF-3 and to the discussion of our findings with Mr. G. Grime and other members of the Toledo Edison Company at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

During this inspection, certain of your activities appeared to be in non-compliance with NRC requirements, as described in the enclosed Appendix. The inspection showed that action had been taken to correct the identified noncompliance and to prevent recurrence. Consequently, no reply to this noncompliance is required and we have no further questions regarding this matter at this time.

Commitments made to resolve concerns noted during the inspection are described in Sections 2 and 3 of the Report Details. Please advise us if our understanding of your proposed actions is incorrect.

Areas examined during this inspection concern a subject matter which is exempt from disclosure according to Section 73.21(c)(2) of the NRC's "Rules of Practice," Part 73, Title 10, Code of Federal Regulations. This information must be handled and protected in accordance with the provisions of 10 CFR 73.21. Consequently, the enclosure to this letter and our report of this inspection will not be placed in the Public Document Room.
