ATLANTA, GEORGIA 30303

TELEPHONE: 526-4537

July 1, 1971

J. G. Keppler, Chief, Reactor Testing and Operations Branch
Division of Compliance, Headquarters (2)

LOCKHEED AIRCRAFT CORPORATION (RER), LICENSE NO. R-86, DOCKET NO. 50-172

The attached report of an inspection of the subject facility by our inspectors on May 19, 1971, is forwarded for information. One item of noncompliance with the Technical Specifications was detected during the inspection. This item involved the untimely analysis of particulate air sampler filters. A Form AEC-592 was issued on May 21, 1971.

Region II was advised by telecon on July 1, 1971, that all reactor fuel and all reactor control rod drives have been removed from the site. According to the Decommissioning Plan, which was approved by a DRL implementation letter dated May 27, 1971, RER License No. R-86 can be terminated after shipment of the fuel and rods and after a confirmation inspection by Region II. We plan to conduct a site inspection early in July to confirm that such shipments are in fact complete. We will advance our findings to you by TWX at the completion of the special inspection.

It is our understanding that at the time of cancellation of License No. R-86 all concerned areas of the facility will be placed under a State of Georgia Byproduct Materials License.

W. C. Seidve
Senior Reactor Inspector
