Gentlemen:

Enclosed is Amendment No. 31 to your Byproduct Material License
No. 37-02006-06.

Please note that the nickel 63 source model number on this amendment is
different from the one specified in your application. Our information
on the nickel 63 source is that the New England Nuclear Corporation
Model NER-7050 is the only source specified for use with the Varian
Model 02-000965-00 detector. You should, therefore, check with Varian
to ensure that this is actually the source that will be supplied to you
with the 02-00965-00 detector call.

Sincerely,

Nathan Bassin
