SUBJECT: COOPER NUCLEAR STATION EMERGENCY PLAN, REVISION 19

We have received your letter dated December 22, 1992, which transmitted Revision 19 to the Cooper Nuclear Station Emergency Plan. The plan revision was submitted pursuant to 10 CFR 50.54(q) and involved recent title changes to certain emergency response organization positions, system changes to the telephone private branch exchange, and updates of certain letters of agreement. We have also received your letter dated December 22, 1992, transmitting your evaluation performed pursuant to 10 CFR 50.54(q) of Revision 19 to the Plan.

We have reviewed the changes and have determined that they are acceptable and do not degrade the effectiveness of your emergency planning at the Cooper Nuclear Station. We note that the expected life of the back-up battery power supply for the PBX has been revised from 10 to 6 hours. We find this expected battery life to be acceptable and that your emergency communications system continues to meet the requirements of 10 CFR Part 50, Appendix E.IV.E.9 and NUREG-0654.

Should you have any questions concerning this letter, please contact Dr. D. Blair Spitzberg at (817) 860-8191.

Sincerely,

L. J. Callan, Director
Division of Radiation Safety
and Safeguards
