Attention: Mr. James D. Shiffer, Vice President  
Nuclear Power Generation

Gentlemen:

Subject: Request for a PG&E Cost Estimate to Install an Additional  
Circuit in Diablo Canyon's EOF and PG&E Permission to Use Site  
Property for Contingency Telecommunications

This letter will confirm a telephone conversation held a month ago between Ms. Teri Mack, Senior Nuclear Generating Engineer, and Mr. Arnold Wieder of this office about initiating arrangements for NRC contingency telecommunications at Diablo Canyon.

These arrangements, the details of which Ms. Mack is familiar, consist of obtaining PG&E's cost estimate to install additional telephone circuits in the Emergency Operations Facility for NRC use and formalizing permission to place temporary repeater stations on top of Davis Peak and Black Butte for NRC emergency telecommunications equipment when it might be needed at Diablo Canyon. The circuits and the temporary repeater sites are essential elements of our emergency telecommunications plan for Diablo Canyon.

We are seeking PG&E's estimate for labor and materials to accomplish the following tasks:

1. Establish three two-wire telephone circuits from the NRC room in the Emergency Operations Facility to the Communications Room on top of the Emergency Operations Facility.
2. Terminate both circuit ends with WE-742 connectors which NRC Region V will supply, and
3. Tag or mark these circuits "For NRC Use Only."

-2-

We will issue a purchase order for this work upon receipt of your estimate. There is no work associated with the repeater sites.

Should you wish to discuss any of this further, please contact Arnold Wieder at 415/943-3783. We appreciate your cooperation on this matter.

Sincerely,

Frank A. Wenslawski, Chief  
Emergency Preparedness and  
Radiological Protection Branch
