Gentlemen:

SUBJECT: REPORT NO. 50-302/85-01

On January 14-18, 1985, the NRC inspected activities authorized by NRC Operating License No. DPR-72 for your Crystal River facility. This inspection involved an assessment of various training programs for supporting licensed activities. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities violated NRC requirements. The violations described in the enclosed inspection report are under consideration for escalated enforcement action. Accordingly, a Notice of Violation is not being issued at this time. No response to this letter is required. However, please be advised that the number and characteristics of violations described in the enclosed report may change as a result of further NRC review. You will be advised by separate correspondence of the results of our deliberations on this matter.

Your attention is invited to unresolved items identified in the inspection report. These matters will be pursued during future inspections.

Should you have any questions concerning this letter, please contact us.

Sincerely,

(Original signed by JNGrace)
