Little Rock, Arkansas 72203

Gentlemen:

This refers to the inspection conducted by Mr. J. R. Boardman of this office during the period May 13-17, 1985, of activities authorized by NRC Operating License DPR-51 and NPF-6 for Arkansas Nuclear One, Units 1 and 2, and to the discussion of our findings with Mr. T. G. Campbell, and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included Arkansas Nuclear One maintenance program and followup on previously identified items. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector. These findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

The NRC inspector was impressed with the changes in the Arkansas Nuclear One (ANO) maintenance program which have been implemented in the past year. When AP&L completes projected improvements in this program and completes identification, evaluation, and utilization of applicable vendor technical information for maintenance in response to NRC Generic Letter 83-28, ANO should have a very good program for maintaining the design basis of a safety-related structures, systems, and components.
