Gentlemen:

This is in response to your letter of June 18, 1975 indicating that you felt that additional time beyond July 9, 1975 was required for you to submit the evaluation of ECCS performance required by the Order of Modification of License issued December 27, 1974. You indicate that you have received the evaluations from your reactor vendor and are in the process of reviewing the material for submittal to NRC. You indicate that to complete your internal review may require a 22-day extension beyond July 9, 1975.

You should submit by July 9, 1975, the information and analysis you have with respect to ECCS performance. You may, of course, supplement your July 9, 1975 submittal with such additional information as you believe necessary including the results of your internal review. We would expect that additional supplemental information may be required during the course of our review.

Until we have completed our evaluation of your submittal and any appropriate technical specification changes or other license amendments have been implemented, the Monticello Nuclear Generating Plant shall be operated in accordance with the restrictions set forth in the Commission's Order of Modification of License dated December 27, 1974.

Sincerely,

Original signed by  
Karl R. Goller

Karl R. Goller, Assistant Director  
for Operating Reactors  
Division of Reactor Licensing
