1. 10 CFR 50, Appendix B, Criterion VIII, as implemented by PSAR Chapter 17, Section 17.1.8, requires that measures be established for the identification and control of materials, parts, and components, including partially fabricated assemblies. These identification and control measures shall be designed to prevent the use of incorrect or defective materials, parts, and components.

Contrary to the above, on February 25, 1985, activities were not accomplished in accordance with the above, in that no arrangements for physical control of access were in place for the instrumentation satellite warehouse on top of the control building.

This is a Severity Level IV violation (Supplement II).

2. 10 CFR 50, Appendix B, Criterion IX, as implemented by PSAR Chapter 17, Section 17.1.9, requires that measures be established for control of special processes including welding.

Contrary to the above, on February 25, 1985, activities were not accomplished in accordance with the above, in that Pullman Power Products (PPP) Pipe Support Field Installation and Fabrication Procedure IX-50 failed to require inspection of fit-up to ensure meeting required effective throat.
