Dear Mr. Denton:

Subject: Combined Inspection Numbers 50-317/93-01 and 50-318/93-01

This letter refers to the safety inspection conducted by Dr. J. C. Jang and Mr. S. W. Holmes of this office on January 4-8, 1993, of activities authorized by NRC License Nos. DPR-53 and DPR-69, and to the discussions of our findings held by Dr. Jang and Mr. Holmes with Mr. C. Cruse and other members of your staff at the conclusion of the inspection.

Areas examined during this inspection, involving your radioactive effluents control programs, are important to public health and safety and are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

Within the scope of this inspection, we noted that you maintained very good programs for radioactive liquid and gaseous effluent control. The knowledge of the Chemistry Department staff and management support to the above programs were excellent. No safety concerns or violations of regulatory requirements were identified.

No reply to this letter is required. Your cooperation with us in this matter is appreciated.
