Memorandum

TO : THE FILES
 THRU: Roger S. Boyd, Chief *R for*
 Research & Power Reactor Safety Branch, DRL

FROM : J. Shea, Research & Power Reactor Safety Branch *Shea*
 Division of Reactor Licensing

SUBJECT: NORTHERN STATES POWER COMPANY MONTICELLO NUCLEAR PLANT NO. 1 -
 MEETINGS WITH THE APPLICANT - DOCKET NO. 50-263

DATE: DEC 15 1966

On December 2 and December 12, 1966, staff members met with NSP applicant representatives to review the safety areas requiring, in the staff's opinion, further documentation. During the first meeting the staff revealed the questions resulting from the review of the Monticello Facility Description and Safety Analysis Report. At the second meeting the applicant's interpretation of these same questions and possible responses to the questions were discussed. On the basis of the understandings reached at these two meetings, G. E. and NSP will proceed to develop written responses expecting that our written questions will be released in the very near future and will essentially be related to the subjects discussed at the meetings.

Attendees (Dec. 2, Meeting)

R. S. Boyd	DRL
