NORTHERN STATES POWER COMPANY)

(Monticello Nuclear Generating)
Plant, Unit 1))

Docket No. 50-263

NOTICE OF RESUMPTION OF HEARING

PLEASE TAKE NOTICE that the public hearing being held before an Atomic Safety and Licensing Board to consider the conversion of Northern States Power Company's provisional operating license for the Monticello Nuclear Generating Plant to a full term operating license, will resume on Tuesday, May 6, 1975, at 10:00 a.m., local time, in Courtroom No. 2, United States Federal Courthouse, 316 North Roberts Street, Saint Paul, Minnesota 55101.

The evidentiary hearing on this matter has been in recess since November 15, 1974, awaiting completion of the preparation of certain written direct testimony. As stated in the original "Notice of Hearing on a Facility Operating License" published by the Commission in the Federal Register on December 27, 1972 (37 F.R. 28544), conversion of the provisional license which was issued by AEC in September 1970, would authorize the company to operate the Monticello facility

at its presently licensed power level of 545 megawatts (electric) for a period of 40 years from June 19, 1967 -- the date the AEC construction permit was issued. The plant uses a boiling water reactor and is located on a 1335 acre site on the west bank of the Mississippi River about three miles west of Monticello.

The license conversion proceeding has been consolidated with a hearing on environmental matters related to operation of the plant which was ordered by the AEC in accordance with its regulations implementing the National Environmental Policy Act.

IT IS SO ORDERED
