COMMITTEE ON FOREIGN RELATIONS
WASHINGTON, D.C. 20510

pdr

CARL MARCY, CHIEF OF STAFF
ARTHUR M. KUHL, CHIEF CLERK

March 8, 1968

The Honorable Glenn T. Seaborg
Chairman, Atomic Energy Commission
Washington, D.C. 20545

Dear Dr. Seaborg:

I have received a number of letters from constituents regarding the nuclear power generating plant which is being opened by Northern States Power Company at Monticello, Minnesota.

The writers of the letters are concerned about the possible risk of exposure to radioactivity caused by radioactive pollution from waste matters getting into the water supply.

I would appreciate your appropriate consideration to this matter and your comments on it.

With best wishes,

Sincerely yours,

Eugene J. McCarthy
