Dear Mr. Hairston:

SUBJECT: SAFETY EVALUATION REGARDING DETAILED CONTROL ROOM DESIGN REVIEW -
EDWIN I. HATCH NUCLEAR PLANT, UNIT 2 (TAC NO. M82761)

By letters dated February 6 and September 16, 1992, you submitted information to support your request for canceling a commitment to implement seven human engineering discrepancies (HEDs) at Hatch Nuclear Plant, Unit 2, regarding regrouping and relocating of seven annunciators.

The NRC staff has reviewed your submittals, and had conducted an onsite control room review on July 8, 1992, to examine the differences in the annunciator arrangements between Units 1 and 2. On the basis of its review, the NRC staff concludes that you have provided sufficient justification, as discussed in the enclosed safety evaluation, to cancel your commitment to implement these seven HEDs.

This completes our action on TAC No. M82761. Please contact me if you have any questions regarding this matter.

Sincerely,

151

Kahtan N. Jabbour, Project Manager
Project Directorate II-3
Division of Reactor Projects - I/II
Office of Nuclear Reactor Regulation
