Note to Dr. Hendrie

MONTICELLO PLANT

The Chairman of the Atomic Safety and Licensing Board has ordered resumption of the hearing on the application for an operating license for the Monticello plant on June 15, 1970.

On May 12, 1970, Northern States filed Amendment No. 26 to its application describing its plans with respect to furnace-sensitized stainless steel in the reactor plant. The applicant is most anxious that the staff have a position on this amendment, which will need to be reviewed by the ACRS, at the time of the resumption of the hearing.

Original signed by
Peter A. Morris

**P. A. Morris, Director
Division of Reactor Licensing**
