Ref. Lic. #52-15968-01
Control #17707

Dear Sir,

This corporation wishes to rescind its application for renewal of the above referenced license dated 6/14/84. We have reviewed our records of the past, looked at future industry requirements and come to the conclusion that there is little need for surge protectors containing radioactive material. Thus effective May 31, 1985, TII Industries, Inc., will cease operations incorporating by-product material into electronic devices. At this time inventory in sealed devices will be stored and distributed through normal channels to persons exempt from licensing requirements. All other inventory will be disposed of according to applicable regulations.

In addition, all contaminated equipment, manufacturing area, etc., used in the manufacture of devices will either be decontaminated or disposed of by burial through a licensed waste disposal agency. Expected date for completion of this phase is to be sometime during the 3rd quarter of 1985.

Please contact the writer if there are any questions.

Very truly yours,

Raul Pelegrina
Plant Manager
