Office of Nuclear Reactor Regulation  
Attn: J. F. Stolz, Chief  
Operating Reactor Branch No. 4  
Division of Licensing  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Dear Mr. Stolz:

Three Mile Island Nuclear Station Unit 1 (TMI-1)  
Operating License No. DPR-50  
Docket No. 50-289  
Proposed Revision to Licensed Operator Training Program

The May 3, 1985 Partial Initial Decision (PID) on the Remanded Issue of Licensed-Operator Training at TMI-1 ordered that the TMI-1 training program be revised to include formal written on the job evaluations of licensed operator performance both during normal and abnormal operation, in accordance with the Boards license condition. Following the issuance of the PID, GPU Nuclear Corporation began immediately to satisfy this requirement and has made good progress in developing a plan for conducting on the job performance evaluations. Licensee will formally present this plan to the NRC staff and other proceeding participants within 30 days of the date of the PID.

Sincerely,

  
R. L. Long  
Director, Nuclear Assurance
