INSPECTIONS CONDUCTED IN APRIL AND JUNE, 1961

This office has been informed by Mr. Willis Johnston that Chicago CO has tentatively scheduled a reinspection of subject licensee's facilities for the week of April 30, 1962. This office has no objections to the proposed reinspection.

We are writing a letter to the licensee confirming receipt of their letter dated April 9, 1962, which was in reply to our notice of violation dated March 26, 1962. However, we suggest that the inspector give special attention to the determinations of employee weighted exposures to airborne radioactivity and the collection and analysis of air samples since the licensee's reply was not sufficiently responsive concerning these matters.

Any further enforcement action with the licensee will be taken on the basis of the proposed reinspection.
