Attached for your concurrence is a notice of violation to American Potash and Chemical Corporation.

We have not included in our notice a citation of noncompliance with 10 CFR 20.201(b) with respect to the licensee's failure to survey surplus equipment for thorium contamination prior to its sale as scrap. Paragraph 20.201(b) does not require that such surveys be made. However, we have discussed this matter in the body of our letter.
