The Honorable Steven H. Schiff
 United States Representative
 2404 Rayburn
 Washington, D.C. 20515

Dear Representative Schiff:

New Mexico became an Agreement State in 1974. The 1978 amendment to the Atomic Energy Act requires the NRC to periodically review Agreement State Programs. New Mexico's Radiation Control Program has always met the requirements to protect the public health and safety. Amendments to the New Mexico Radiation Protection Regulations, which became effective in May 1995, kept the state's program in compliance with NRC requirements.

Historically, the NRC has maintained a continuing relationship with each Agreement State to assure continued compatibility of the State's regulatory program and its adequacy to protect health and safety. This relationship included, among other things, training of Agreement State regulatory staffs at no charge to the participants. Beginning October 1996, the NRC will begin charging the Agreement States such as New Mexico for all training needs.

New Mexico's Radiation Control Program is funded wholly from the State General Fund and monies are unavailable to support training programs for staff previously sponsored by NRC.

The Department believes that the minimal support (approximately \$15,000 per year) provided to New Mexico through the States Agreement Program is a bargain for the NRC and should be continued. Should the NRC be required to assume regulatory responsibility for the state byproduct programs based on rescission of the agreement, the cost to the NRC would be substantial compared to the minimal support now provided to New Mexico.

If financial assistance for Radiation Control Program personnel training is not restored, New Mexico will have to look seriously at returning its entire Radiation Control Program to the NRC. Such an action would undoubtedly lead to the closure of many of the State's smaller businesses licensed to possess and use radioactive materials, since they will be unable to conform to the NRC's ever-escalating fee schedule.

Your assistance in petitioning NRC to amend its policy and restore financial support for the training needs of the Agreement States is strongly encouraged and will be greatly appreciated.

Please contact Mr. Benito J. Garcia or Mr. William Floyd of my staff at (505) 827-1557 should you have any questions.

Sincerely,

Mark E. Weidler, Secretary
 New Mexico Environment Department
