COMPLIANCE INSPECTION REPORT FOR
AMERICAN POTASH AND CHEMICAL CORPORATION
LINDSAY CHEMICAL DIVISION
WEST CHICAGO, ILLINOIS
INSPECTIONS CONDUCTED ON APRIL 30, MAY 1, 2, 3,
JUNE 14 AND AUGUST 16, 1962

LICENSE NO. R-234 (DOCKET NO. 40-2061)

LR:RR

Attached for your concurrence is a notice of violation for
the subject licensee.

The subject report recommends that the licensee be cited for
noncompliance with 10 CFR 20.305 in that "the licensee treats
bags contaminated with licensed material by incineration with-
out specific approval by the Commission." Since it has not
been established whether the ore contained in the bags is, in
fact, licensed material, we are deleting the citation.

The subject report also recommends that the licensee be cited
for noncompliance with 10 CFR 20.301 in that "the licensee
is disposing of radioactive waste by discharge into a waste
pond on his property." We are deleting the citation since
the use of a waste pond in the licensee's operations was known
and accepted when License No. R-234 was issued.
