Gentlemen:

This refers to the inspection conducted by Mr. R. Baer of this office during the period March 12-15, 1985, of activities authorized by NRC Construction Permits CPPR-126 and 127 for Comanche Peak Steam Electric Station, Units 1 and 2, and to the discussion of our findings with Mr. R. A. Jones, and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included the radioactive waste management and low-level waste storage programs. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector. These findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

"Original Signed by:"

D. R. Hunter, Chief
Reactor Project Branch 2
