Nuclear Regulatory Commission
Washington, D.C.

Gentlemen:

I want to express my opinion that I agree with Commissioner Asselstine in his separate opinion at 50 Fed. Reg. that the interim change in the definition of 'meeting' under the Sunshine Act would obstruct the intent of the act and should be dropped.

I think the rules that the commission has been operating under as regards the Sunshine Act should be continued and believe we need all the exchange of information we can have on this subject (nuclear power). The Commission will loose credibility if they make their deliberations less available to the public.

Thank you,

Martha Drake
