## BASIC REQUIREMENTS FOR CONTINUED OPERATIONS OF PMC's OMEGA IRRADIATOR

1. Repair of pool leakage by installing a steel pool liner; or by other means acceptable to the NRC.
2. Identify personnel responsible for the operations and radiation safety of the facility and provide resumes for each. Identify the responsibilities and authorities of these personnel. Specify their technical experience, qualifications and training relative to irradiator operations. Provide verification that these personnel have sufficient understanding of the computer program used to effect operation of the irradiator and the associated safety interlocks.
3. Identify how other users of the irradiator will be trained. Specify the training program and how it will be implemented.
4. Provide a description of financial resources actually available to the corporation, prepared by an independent third-party accounting firm, for the purpose of supporting personnel, repairing the facility, and conducting operations. Identify all financial liabilities of the corporation, including creditors and the amount of outstanding liens. Identify stockholders and their interest in the corporation. Identify what provisions, including financial consideration (such as a bond or trust), will be made for decommissioning the facility when the license is eventually terminated.
5. Identify all legal actions that the corporation is involved in, including suits and counter-suits.
6. Describe all records, logs, and documentation that is expected to be maintained in support of operations, including records pertaining to radiological parameters (i.e., maintenance records, pool water level monitoring records, operating logs, system monitoring logs, personnel training and qualification records, personnel dosimetry records, test documentation, etc.).
7. Identify all of the corporate officers of the corporation and provide resumes for each.
8. Provide for a qualified third-party to inspect and audit the operational readiness of the facility, including personnel readiness, prior to actually resuming licensed activities.
