Ref. License # 42-02964-01

Dear Ms. Jackson:

Attached is a check in the amount of ten (\$10) requested in your letter dated February 22, 1984 to complete the requested fee for Dresser Atlas' Well Logging License Renewal.

In reviewing the copy of Section 170.31 accompanying your request, I must admit I was in error when I thought the fee to renew a category 5A license was more than \$460 as stated in my letter to you February 13, 1983.

The Thorium 228 authorized by our license is in 10 microcurie plastic laminated calibration sources. They are used to calibrate logging tools. Since category 5A licenses for possession and use of special nuclear material and/or by-product materials for well logging, well surveys and tracer studies, that would seem to include everything. To my knowledge Dresser Atlas does not possess any radioactive material that is not used for well logging, well surveys or tracer studies.

I respectfully request that you reconsider the applicable license fees. Please contact me if you require more information or have any questions.

Sincerely,

A handwritten signature in cursive script, appearing to read "E. D. Mott".
