- 1) Delete "(60 ± 1.2 Hz)" from TS 4.8.1.1.2.a.4 and reword for clarity.
- 2) Ac'd verbiage to the Basis of TS 3/4.8.1, 3/4.8.2, and 3/4.8.3 to provide clarification of the 10 second time requirement of TS 4.8.1.1.2.a.4 and add monitoring and trending of time to reach steady state voltage and frequency.

The enclosed changes supplement the previous submittals listed above. Only the pages affected by this latest revision are included. Please replace the affected pages with the attached. This submittal provides editorial changes relating to the subject proposed change. This additional information has no affect on the previously provided no significant hazards determination.
