date

Summary: This meeting was held to discuss the rescheduling of the SRO licensing examination at the Susquehanna Steam Electric Station. The licensee had previously cancelled this exam.

DETAILS

1. Meeting Scope

This meeting was held to discuss the rescheduling of the previously cancelled SRO licensing examination at the SSES.

2. Meeting Attendees

Licensee - PP&L

W. G. Ward, Nuclear Training Manager
W. Lowthert, Nuclear Instruction Supervisor
R. M. Peal, Operator Training Supervisor

NRC Region I

R. Keller, Chief, Reactor Projects Section 1C, DRP
D. Lange, Reactor Engineer Examiner
F. Crescenzo, Reactor Engineer Examiner
L. Banavitch, Reactor Engineer Examiner Trainee

3. Discussion

The case presented by the licensee representatives demonstrated adequate need for the November 1985 SRO licensing examination. The candidate will be needed to serve as an immediate substitute for the SSES Supervisor of Operations; this position requires an NRC SRO license. The candidate has been judged by the licensee as having the education, maturity, and experience needed to fulfill the requirements of this position and the licensee feels he lacks only the SRO license.

The Region I agreed to conduct the examination after consideration of the licensee's needs and the expected impact of this exam on the remainder of the BWR Examination Schedule.

The following topics related to operator licensing were informally discussed during the meeting.

- A proposed trip to the Susquehanna Station by the BWR Operator Licensing examiners for simulator familiarization.
- The 1985 SSES Requalification Schedule.
- The INPO Accreditation program.

4. Licensee Commitments

The licensee agreed to provide the NRC with the 1985 Requalification exams and simulator scenarios prior to their use in the 1985 Requalification Schedule for Susquehanna.

The licensee also agreed to provide the NRC with the revised Emergency and Off Normal Operating procedures for use in preparing for the November examination.

5. NRC Commitments

The Region agreed to administer one (1) Instructor Certification and one (1) Instant SRO examination on November 20 and 21, 1985, at the SSES.

The NRC also agreed to evaluate and provide comments on the licensee's 1985 Requalification exams before their implementation.
