Tennessee Valley Authority  
ATTN: Mr. H. G. Parris  
Manager of Power and Engineering  
500A Chestnut Street Tower II  
Chattanooga, TN 37401

Gentlemen:

SUBJECT: REPORT NOS. 50-327/84-38 AND 50-328/84-38

Thank you for your supplementary response of May 31, 1985, to our Notice of Violation issued on February 13, 1985, concerning activities conducted at your Sequoyah facility. We have evaluated your response and found that it meets the requirements of 10 CFR 2.201. We will examine the implementation of your corrective actions during future inspections.

This response was further discussed on June 25, 1985, with the Sequoyah Compliance Supervisor and several members of the task force who participated in the review of facility modification packages requiring post-modification testing and functional testing. It is our understanding that the task force screened a total of 473 modification packages for selection of further review which appeared to be safety related modifications and requiring functional or post-modification testing. In the initial survey, 25 modifications received in-depth review; however, after identification of several items of concern, the scope of the review was expanded. As a result, a total of 124 modifications were reviewed and eight items of concern were subsequently identified. Furthermore, it is our understanding that the recommendations made to strengthen programmatic areas of Sequoyah's testing program, outlined in your response are in fact commitments.

Should you have any questions regarding this understanding, we will be pleased to discuss them.

We appreciate your cooperation in this matter.

Sincerely,  
Original Signed by  
Roger D. Walker
