Mr. Cecil O. Thomas, Chief
Standardization & Special Projects Branch
Division of Licensing
United States Nuclear Regulatory Commission
Washington, DC 20555

Re: Docket No. 50-252

Dear Mr. Thomas:

This is to inform you that full implementation of our accepted
Emergency Plan was completed at the end of September.
Due to a number of delays here I was unable to prepare this
letter of notification to you until now.

We were notified in June that this plan for the University of New
Mexico AGN-201M reactor was approved and should be implemented.
Our implementation has included training in our new procedures
for all of those involved in them and appropriate posting of
those procedures. Our periodic review and requalifications
sessions will, of course, include this new information.

Sincerely,

David M. Woodall
Chief Reactor Supervisor

CC: Professor Frank L. Williams, Chairman and Reactor Administrator
Mr. Will Tabor, UNM Radiological Safety
