

KANSAS GAS AND ELECTRIC COMPANY

GLENN L. KOESTER  
VICE PRESIDENT - NUCLEAR

October 11, 1985

Mr. Harold Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

KMLNRC 85-229

RE: Docket No. STN 50-482

REF: 1. Letter dated April 16, 1985 from HLThompson, NRC  
to All Power Reactor Licensees and All Applicants for  
Power Reactor Licenses, Quality Assurance Guidance  
for ATWS Equipment That Is Not Safety Related  
2. OG-156 dated July 25, 1985

SUBJ: 10 CFR 50.62 (ATWS)

Dear Mr. Denton:

This letter is being submitted pursuant to 10 CFR 50.62 concerning implementation schedule of the ATWS requirements. The issuance of Reference 1 set a date of October 13, 1985 for the submittal of this information.

Kansas Gas and Electric Company (KG&E) is currently considering several design modification options offered by various vendors. Three of the modification options under consideration were developed through the Westinghouse Owner's Group and have been submitted to the NRC via Reference 2 for review and approval on July 25, 1985. It is our understanding that the submittal is currently under review by the staff with an SER issuance target date of mid-November. Upon issuance of the SER, KG&E will complete its evaluation of the design modification options and select the design that is best for Wolf Creek Generating Station.

2

October 11, 1985

Based upon information available at this time, KG&E intends to have the modification completed prior to restart following our second refueling. We will keep the NRC Project Manager aware of our progress and will advise you if any issues develop that could impact this schedule.

If you have any questions, please contact me or Otto Maynard of my staff.

Yours very truly,

Glenn L. Roester  
Vice-President - Nuclear
